**Subject:** Flow, Passage, Salinity and Water Quality BDCP appendix

Erin,

FYI due to the small percentage of the appendix we received for review, FWS and NMFS have decided not to provide formal comments on the incomplete document. The agencies will provide joint comments on the appendix in its entirety at the closing of the next comment period on November 4th. We are still reviewing what is available now in hopes of making life easier in 2 weeks. I have only scanned the first portion but am hoping to wallow in it this afternoon. Will check back with you soon.

Thanks,  
Leanna
